

USE OF AFTERMARKET PARTS POSITION STATEMENT

The original parts used on all FCA US LLC vehicles are designed and built to provide optimum fit, function, safety and structural integrity. These parts are carefully designed to act as a safety system and are rigorously impact tested to ensure optimal performance. Because of this, FCA US LLC does NOT approve of the use of recycled, salvaged, aftermarket or reconditioned parts. Aftermarket parts may not be built to FCA US LLC's exact design and can therefore affect the performance of important structural and safety features of the vehicle. The best way to ensure replacement parts meet the safety, performance and quality standards set by FCA US LLC is to purchase Original Equipment parts through an authorized FCA US LLC dealer. In the event that collision repairs are necessary, all repairs should be performed by a trained technician and follow vehicle-specific repair procedures available at <https://www.techauthority.com>. Failure to follow proper procedures or deviation from Original Equipment parts could result in compromising performance of impact safety systems.

FCA US LLC vehicle lease agreements specify that ONLY Genuine FCA US LLC replacement parts be utilized for collision repairs to the vehicle.

Release Date: November 20, 2019
